College Assistance Migrant Program Scholars Initiative

Study Abroad

It is required for all of our students to have an international study abroad experience. We introduce students to this experience through an International Engagement in Mexico, (IEM).

International Engagement in Mexico is an exciting, meaningful, short-term, intense opportunity to make a difference in the lives of those at the fringes of Mexican society. During Spring Break, students will be active members of a team which will engage with local community members through the provision of needed maintenance and program assistance to Mexican human service agencies. Additionally, students will explore the foundations of local cultures through visits to cultural/historic sites; connect with community agencies and people; and participate in local special events.
